

**THIS DOCUMENT SHOWS A SETUP SAMPLE ON A CPANEL SERVER, AND CAN BE REPLICATED ON OTHER SETUPS.**

**You can also join our discord at <https://discord.gg/QfUJhzFsju>**

**Setup your server with Apache, mysql, php 8.1, composer, nodejs16 & PM2**

Force Domain SSL

Generate SSL CRT KEY & BUNDLE

COPY THE CONTENTS OF YOUR CRT/KEY/BUNDLE TO FILES IN FOLDER CASINO/  
PTWEBSOCKET/SSL/

**Create a new email & password**

**Create a new database**

Grant all access

Import the SQL file located in folder CASINO/DATABASE/MIGRATIONS/betshopme\_8.sql via  
PHPMYADMIN to the database

extra DB file not required (experimentalarcadegames.sql) unless you are experimenting with  
arcade games

**Zip File Uploads**

Casino.zip and public\_html.zip should be unzipped in the following manner

public\_html → this is your public directory

casino → this goes outside your public folder for security

so it becomes

YOUR ROOT FOLDER

**/casino**

**/public\_html**

**If you decide to move your casino folder INSIDE public\_html**

You have to modify two things

1: open index.php inside public\_html and replace all folder paths ( ../casino portion to ./  
casino/ )

2: MUST configure .htaccess to deny .env files or all dot files ( google dot files protection via  
htaccess)

**//\*\*\*\* extra tip since it contains demo user accounts**

Generate new password hash for existing users and run this in phpmyadmin (replace hash)

<https://bcrypt-generator.com/> If you need to has a new word.

Example : (run this in phpmyadmin)

UPDATE w\_users SET `password` =

'\$2a\$12\$s1RpwEx/oTL3vYQGZjC33eBHECRJb7gkjmAk9Tmyefub7gQ4nh8XS';

This has makes all users have password : Test123

\*\*\*\*\*///

## SSL SPECIFIC INSTRUCTIONS

Delete self signed if any

Generate or install the Lets Encrypt one if you have it

Save text file via notepad or direct

Certificate: (CRT) ==> crt.crt

Private Key (KEY) --> key.key

Certificate Authority Bundle: (CABUNDLE) ==> intermediate.pem

Go in Folder casino/PTWebSocket/ssl and replace those 3 files

-----

## FILE EDITS

casino/.env

EDIT LINES

for domain, database and user/password, email and password

EDIT

casino/config/app.php (URL line 65 )

**EDIT casino/public/\* ALL SOCKET FILES CHANGE YOUR DOMAIN NAME**

**IF YOU NEED TO CHANGE PORTS YOU CAN DO SO HERE AS WELL**

## Games downloads

Find download packages at <https://discord.gg/QfUJhzFsjU>

Currently ~ 1000 games – 40 GB total.

Go to /home/USERNAME/public\_html/

Password is : **password**

Download the core + 3 game packs

Unpack

(Tip : upload one zip, unpack with:: 7z x -ppassword file.zip )

---

## PM2 COMMANDS

### FROM INSIDE

<https://pm2.keymetrics.io/docs/usage/quick-start/>

### PTWEBSOCKET COMMANDS +

```
pm2 start Arcade.js --watch
```

```
pm2 start Server.js --watch
```

```
pm2 start Slots.js --watch
```

OR if you tested before and not expecting errors, all in one command :

```
pm2 start Arcade.js --watch && pm2 start Server.js --watch && pm2 start Slots.js --watch
```

### SAMPLE USEFUL COMMANDS

```
pm2 stop all
```

```
pm2 delete all
```

```
pm2 flush
```

```
pm2 logs
```

all commands on <https://pm2.keymetrics.io/docs/usage/quick-start/>

extra tool can be used called wscat (install via ssh)

```
wscat -c "wss://domain:PORT/slots" <--- as an example to make sure you get connected msg
```

### Open ports in Firewall

22154 22188 22197 (or whatever you set your Socket file ports to)

**Run site** :: it should work now if everything was setup correctly.

### Visual Edits :

To change Sliders Text, and footer notes / terms and conditions.

Edit : `\casino\resources\lang\en\app.php`

Lines 1255 ++ include text in frontpage

Sliders are in root folder `/woocasino/` for easy access and change (slider1,2,3,4,5 and for mobile mslider1,2,3,4,5)

-----Unlock Hidden Features-----  
---

**casino/resources/views/backend/partials**

BACKUP sidebar.blade.php

**rename sidebarall.blade.php to sidebar.blade.php**

Now reload your admin panel.

To install Experimental Arcade games, import experimentalarcadegames.sql

Once sidebar is unlocked all the following features will be available.
